

# FRONT RANGE PASSENGER RAIL

## PLANNING A NEW TRANSPORTATION OPTION FOR YOU ALONG COLORADO'S FRONT RANGE

As our communities grow, a new passenger train will connect Front Range Coloradans to jobs, affordable housing options, opportunities, adventure and each other. Are you ready to leave long commutes and heavy traffic behind? We are too. We're planning for a future of safe, reliable and climate-conscious travel.

**WHERE:** Initially offering service from Fort Collins through Denver and south to Pueblo, Front Range Passenger Rail intercity train service has the long-term vision of connecting Colorado to New Mexico and Wyoming.

**WHY:** From 2020 to 2050, an additional 3 million people are expected to live and commute along the Front Range in Colorado. Front Range Passenger Rail will provide a relaxed, efficient and safe transportation option that connects affordable housing, employment hubs and key destinations.

**WHEN:** After a decade of planning, the Front Range Passenger Rail District is now evaluating routes, stations, service, infrastructure, operations, costs and financing. Daily train service is expected to launch within the next decade.

**HOW:** The Colorado Legislature created the District to construct and operate a passenger rail system along the Front Range. Using existing tracks shared with freight railroads and leveraging partnerships with transportation providers, elected officials and community leaders minimizes costs and accelerates the service start date. New passenger rail programs and federal funding established through the Infrastructure Investment and Jobs Act makes this a once-in-a-lifetime opportunity to provide Front Range Passenger Rail service in Colorado.

# THE DISTRICT

The District extends from the Wyoming to New Mexico borders, spanning portions or the entirety of the 13 counties near Interstate 25 in Colorado. The nine stations will connect to other public transit services to provide an accessible transportation option.

We'd like to hear from you! Use the QR code to tell us how you'll Ride the Front Range.

# BENEFITS OF PASSENGER RAIL

## RELIABLE, ENJOYABLE TRAVEL

Unlike cars and buses that get delayed by roadway crashes, heavy traffic and weather, trains offer a more reliable and consistent travel experience. The time travelers will save by not sitting in traffic can be used to instead work, read, catch up with friends and family or relax.

## CONNECTED COMMUNITIES

Front Range Passenger Rail will better connect the many employment centers, affordable housing options, colleges, universities, medical facilities, and entertainment hubs along the Front Range corridor.

## STRONGER LOCAL ECONOMIES

Train service and stations are investments that pay dividends. As attractive destinations, stations can be the backbones of vibrant downtowns, supporting local economies.

## SUSTAINABLE GROWTH

Individual transportation is the largest contributor to air pollution in Colorado. As the state continues to grow, it is critical to invest in solutions that support a sustainable future. Shifting transportation to passenger rail will take cars off the road, reduce emissions and improve air quality.
